

## Renewable School & Classroom Application Form

Please complete as many fields in the application as possible. Note it is possible to save your application in our system while you are gathering additional information, but all required fields must be completed before submission. If you have questions regarding the grant application process, please contact us.

**School or Site Name:**

Please type the name of the facility that will host the project.

**School / Facility Website:**

**School District / Facility Owner:**

If applicable, please provide the name of the school district, charter school network or other umbrella organization that is responsible for signing contracts and general school administration.

**Type of Organization:**

- Private School
- Public School
- Charter School
- Other Educational Facility

**School / Facility Profile:**

BEF strives to work with a diverse set of schools. Please describe your school: indicate if it is located in an urban or rural setting, comment on the demographic composition, income levels and opportunities for parental involvement. Please note any other information that will help us get a better sense of your school's community.

Solar 4R Schools™ is a program of BEF.

**BONNEVILLE ENVIRONMENTAL FOUNDATION** : 240 SW 1st Avenue  
: Portland OR 97204  
: 503-248-1905  
: [www.b-e-f.org](http://www.b-e-f.org)

**Grade Level:**

- Elementary School
- Middle School
- High School
- K-12
- K-8
- Technical College
- University
- Other

**Total Student Body:**

How many students are there at the school?

**Participating Classrooms:**

How many teachers at the school are currently interested in participating in the teacher training and integrating the Solar 4R Schools™ materials and activities into their classrooms?

**Students Reached:**

How many students do you expect would be reached each year through implementing this project?

**Cost Share Narrative:**

Renewable Classroom projects require a \$2000 contribution from the applicant; Renewable School projects require a \$15K contribution from the applicant. If you already have matching money or other funding partners, please note those partners and their commitments here. If you have questions about how to raise this amount please contact us directly before applying.

You may also add some narrative about your community partners and their commitments of support that you have secured in this section. If you own an existing PV facility on your building and would like to add data monitoring to it, please contact us before completing this application.

**Cost Share Amount:**

**Project Statement:**

In the space provided below, please indicate why you are applying for a Renewable School or Classroom Project. Include your goals for the project and what you hope to receive from BEF in terms of training, materials and curriculum assistance. This is an appropriate place to demonstrate your school's commitment to STEM, renewable energy or other sustainability goals.

## Educational Deliverables & Project Timeline:

In exchange for providing schools with solar projects, BEF requires the recipients to commit to certain Deliverables in order to further the educational mission. BEF will select schools, primarily, based on the quality of the proposed Educational Deliverables. The Teacher Champion will integrate the renewable energy educational material provided by BEF into existing classes where appropriate. Be prepared with a write-up of your proposed deliverables, complete with a timeline, products and a metric for determining that you have been successful with each activity. These deliverables should clearly match the goals illustrated in your "Project Statement." Examples of high-quality deliverables have the following components:

- Complete description of the deliverable (rather than just bullet points)
- Clear measures of completion/success
- A person clearly responsible for completion of the tasks
- Target date(s) of completion for project milestones
- Ensures sustainable improvement for years to come for your STEM/STEAM educational programming

Generally, BEF likes to see schools commit to at least 3-5 meaningful Deliverables. We evaluate this section very closely – so propose your best ideas – the more creative, the better! Deliverables can range from means by which to leverage our science kit materials, existing curriculum or projects into the classroom to hosting engineering challenges, creating environmental or renewable energy clubs, or engaging with student, local or national media.

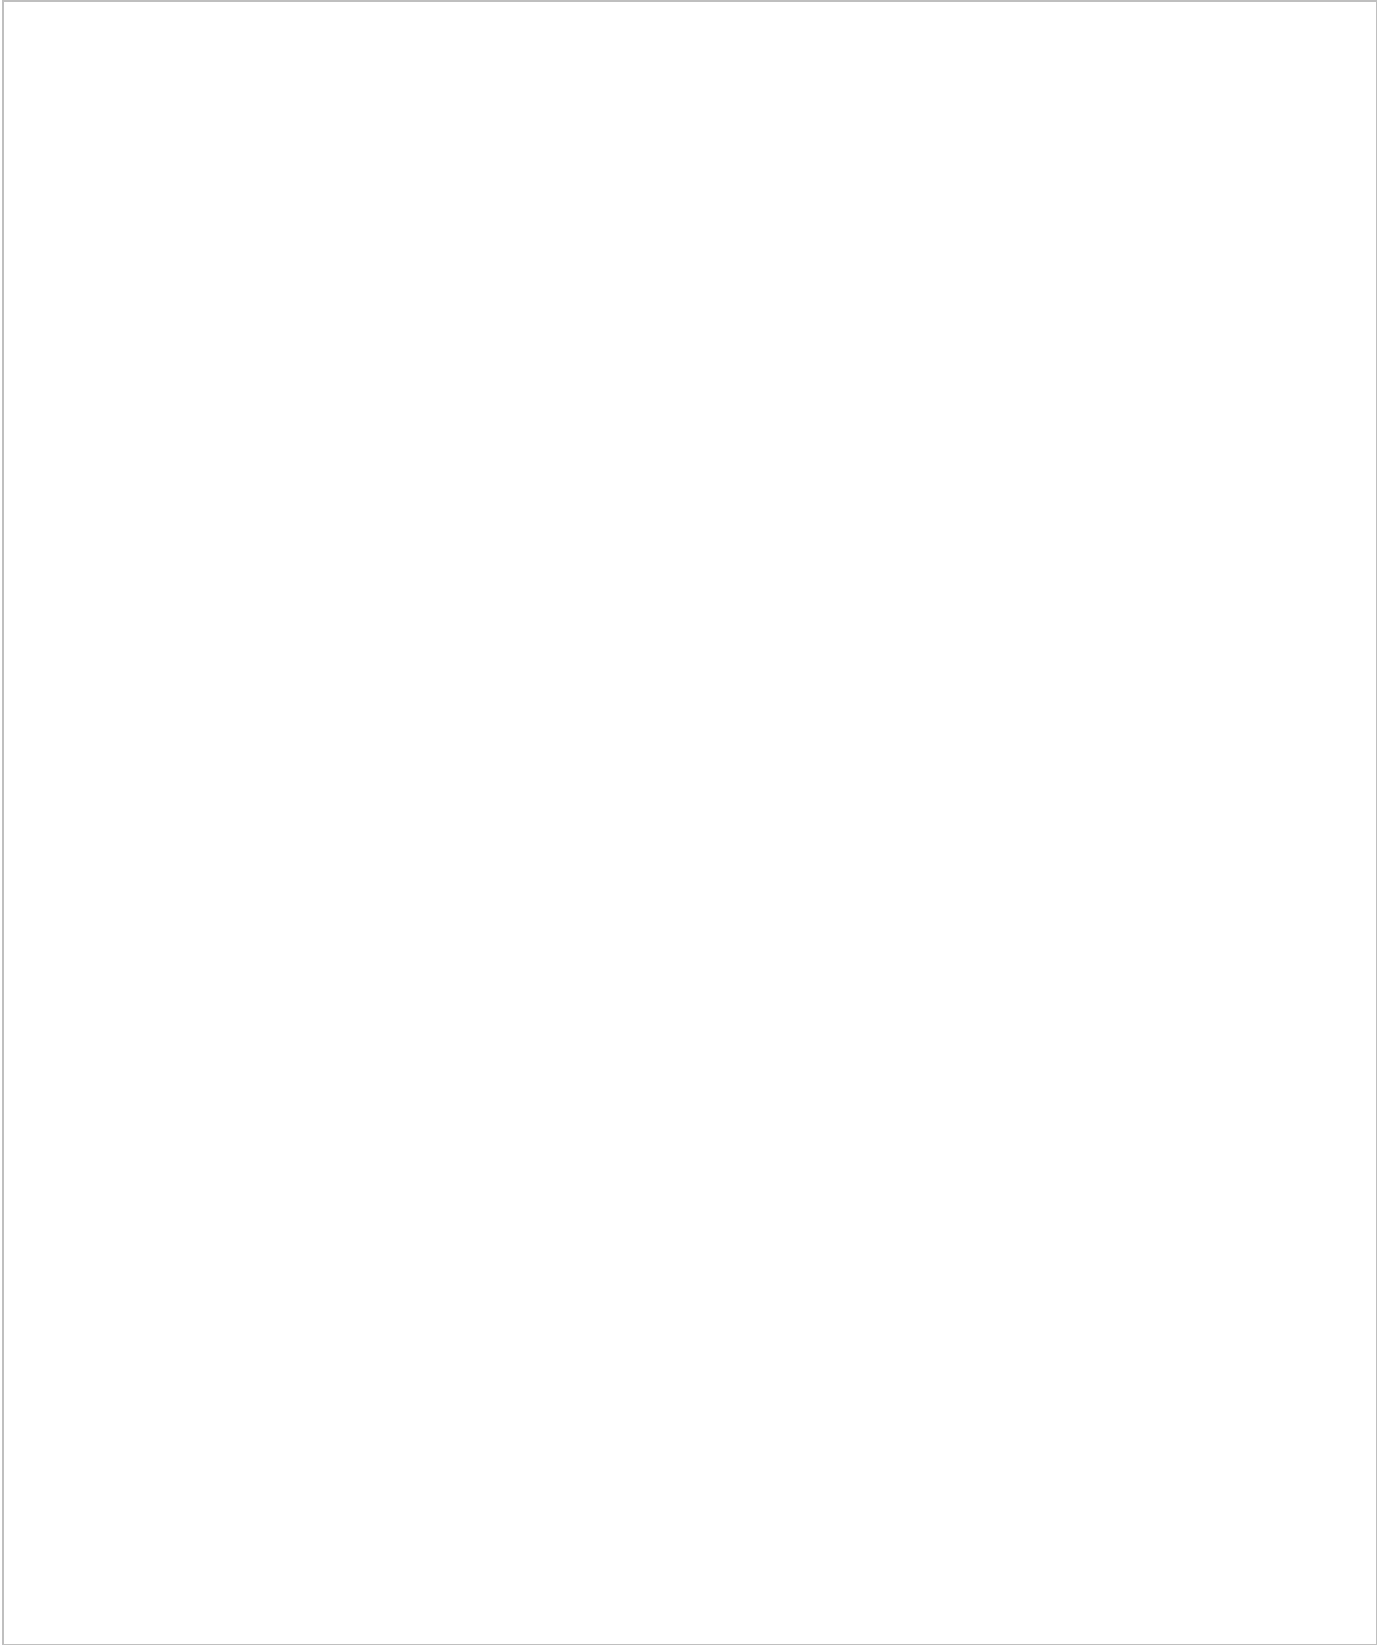

**Project Report** (mandatory). The Teacher Champion will submit a Project Summary Report to BEF after one year of project operation. Please acknowledge this in your proposal. This report will include, at a minimum, the following information:

1. Details related to the other Deliverables listed in this Agreement
2. General updates on other curricula or events related to the project, including pictures and videos (for which you have signed permission forms on record at your school), and any social media, internet, and local news links you wish to share

In the space below, please prepare your detailed plan for your deliverables. Note that if you are applying for a Renewable School project, you should include information that conveys that you understand and how you meet the additional eligibility requirements for the installation of a PV system on your facility.
